- Private positions, comments and comment history
- Easy to manage position updater/recognizer (see source message)
- Secure updating and sorting service
- Share positions
- Private vessel information and attach documents
- Create/save/search/merge lists and search criteria.
- Many, many more dry-bulk chartering-specific user-friendly tools

- Manage market orders, TC's and COA's
- Secure message updating and sorting service
- Enter your own cargo orders (Cargoes, TC, COA)
- Create/save/search/merge lists and search criteria
- Mark orders (market, fixed, fixed TBN)
- See market orders trends within same search criteria
- Auto-joining of duplicate orders

- Link to AXSDry ship database and up-to-date speed/cons
- Link to our in-house distance table and port library
- Link to our bunker prices database updated daily
- Unlimited sequences and number of cargoes, manage parceling and bunkering/passage ports
- Compare ships for a same voyage
- Use our integrated intake calculator
- Enhance library of calculations
- Private comments can be added to saved calculations

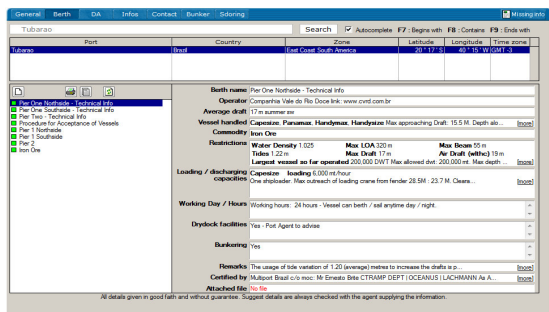

Databases

Distance Table

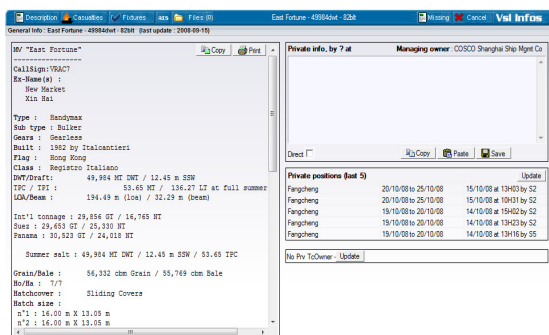

- Complete data over 10000 ports
- 50000 potential waypoints
- ~100 possible nautical routing points
- Estimate voyage durations on a variety of routes and at different hypothetical speeds.

Port Information

- Over 1500 commercial ports
- Berth information including draft restrictions, water density,...
- DA's available for specific size of ships and specific commodities
- All agent contact details at port (source)
- Fully integrated with AXSDry Voyage Calculator
- Interactive – enter your own private information

Vessel Technical Descriptions

- Information available on all size of ships including speed and consumptions.
- An extensive and rigorously accurate information database for your private use, fully maintained by our experts.
- Descriptions are created with LRFairplay and TC information provided by our community of owners to ensure accuracy
